

Appl. No. 10/761,737
Amdt. Dated November 15, 2004
Response to Office Action of August 13, 2004

AMENDMENTS TO THE SPECIFICATION:

Please amend the paragraph of the specification commencing at page 3, line 14 as follows:

The lens layout setting apparatus for lens grinding processing apparatus according to the present invention comprises function setting means on which is achieved various settings required to ~~calculation~~ calculate data of eyeglass lens shape for an eyeglass frame, and to ~~calculation~~ calculate data of eyeglass lens grinding process to grind the eyeglass lens based on the data of eyeglass lens shape for an eyeglass frame, wherein said layout setting apparatus further comprises control means to add, to delete or to sort a setting ~~condition~~ item of said function setting means, is provided.

Please amend the paragraph of the specification commencing at page 3, line 21 as follows:

According to another aspect of the present invention, the lens layout setting apparatus for lens grinding processing apparatus comprising function setting means on which is achieved at display screen various setting required to ~~calculation~~ calculate data of eyeglass lens shape for an eyeglass frame, and to ~~calculation~~ calculate data of eyeglass lens grinding process to grind the eyeglass lens based on the data of eyeglass lens shape for an eyeglass frame, wherein said layout setting apparatus further comprises control means to control so as to set the selected condition after a predetermined time interval when a indicator (cursor) has been put on an item to be selected which is displayed on said display screen corresponding to the setting ~~condition~~ item of said function setting means, is provided.
